DAMAGE TO

Yesterday.

MACHINERY NOT DESTROYED | CONDITION OF PROPERTY | NEW URANIUM DEPOSITS

Vice President J. D. Wood So Advised Today-He Receives a Telephone Message From the Mine.

The disaster at the Quincy shaft-Park City, yesterday, is not as serious damage to property is concerned.

Vice President J. D. Wood was in communication with the mine by teleger was on the other end of the wire. and from him the information was as certained that outside the wrecking of

everything else was intact.

He stated that he did not believe that the machinery, nor the gallows frame had been damaged by the slide. and expressed the opinion that it would not take more than five or six days at the most to get things repaired and

in working order again.

It was feared by Vice President
Wood and other officers of the company that it would take much longer, but judging from what Mr. Bamberger has to say the tonnage from the Quincy will only be lacking for a few

ores hoisted from the Quincy shaft for some time past has aggregated about 60 tons per day. From this source much of the high grade ores were being extracted. The product produced recently has run about It is probable that \$1,000 will cover all the damages done to the proper-

Mr. Bamberger will return from the mine on tonight's train from the Park.

The wreckage is being cleared up as rapidly as possible, and the weather in the camp today is pleasant.

DROP IN NEW YORK.

Stock Felt Effect of Orders of a Cessation of Work. New York Bonanza was swept down the toboggan at a furious speed this morning during the regular and open board calls of the stock exchange. A cessation of operations at the mine, which was ordered at a meeting of the board of directors yesterday, is assigned as the reason for the sudden fall. It was expected that the disas-trous snowslide, which occured at the Quincy mine yesterday, would cause a decline in Daly-West stock. The bears

are always on the alert for such op-portunities, but they falled to make much of a showing in pounding down Only one small block was transferred during the regular call; on the open board a 155 share lot was taken down at \$39 even. Daly-Judge held strong, while Lower Mammoth showed a decided shrinkage compared to yesterday's figures. There was a notice-able demand for the speculative stocks this morning, but only in small quantities. Wabash exhibited more vitality

and closed with 2614 bid. The following quotations and sales were posted at the close of the pro-

. OFFICERS CHOSEN FOR DALTON MINE

Not as Serious as Reported Late | Board of Directors Will Remain | Over \$67,000 Paid to Freighter Same as Last Year.

Is Reported Good - Company Has Over \$2,000 in its Treasury-Construction of Tramway Advised.

At the annual meeting of the Dalton house of the Daly-West company, at Gold Mining company, which is conducting its exploitations in the Marystale region of the Gold Mountain district, the following board of directors vas chosen: B. A. McMillen, J. H. Lakin, A. H. Adkison, Dr. T. B. Beatty H. Dowse, O. R. Young and C. M. Carrison. The personnel of the board is the same as last year. The members will probably meet some time today for organization.

In his report of conditions and the progress made at the property in the jest year, Managing Director Young "The No. 5 Incline workings have

been extended by various drifts, crosscuts, upraises and winzes, all upon the well defined vein. Particular mention is made of a linze following the vein from the second level. The Comet tunfeet, the drift has been extended 189 eet of this, and its extension is entirely upon a well defined vein. Varicross-cuts in the Comet tunnel workings have been made to explore the extent of the vein exposed. No. 2 unnel has been extended on the vein 2 feet, Considerable satisfactory proecting has been done in the Hardcash guich and ore of very high grade in small quantities found. The total amount of work done during the year aggregates 723.5 feet.

"White nothing of a sensational value has been found and the first feet."

has been found, much of the work has een done upon lines of ore, averaging n value from \$5 to \$15, "Work is at present being prosecut of in No. 8 incline workings and pre-parations are being made to sink upon

the vein from the second level. The physical condition is good and all workings are accessable for examinaon and in as good condition as their importance demands. While there is not unlimited quanti

ties of milling ore exposed in the mine, there is as much ore exposed as consistent with the work done, and enough o warrant giving attention to the convencion of a tramway to the mill. It is believed that the development of ore could be kept ahead of the operaens of the mill on a small tonnage ustify its construction.' The report of Secy, C. M. Garrison shows the receipts of the year to have been \$12,907.50, which includes \$84.05 ash on hand at the beginning. The ! ands obtained came principally from ssessments levied, the amount realized in that manner being \$122,500.

The expenditures were \$10,837.33, leavng a balance on hand of \$2,070.17.

the rate of \$360 per year. DRUM DISTRICT MINES. Tests Made at the Charm Mine Show Good Results.

The only salaried officer of the com-

pany is the secretary who is paid at

Encouraging reports continue to come from the Drum district and local men interested in that region, have every reason to believe that the country is going to develop into one of the most productive sections of the state.

At the Charm mine, where a new ore reserve was recently tapped, conditions are on the improve. The winze in which the ore was encountered has reached the depth of 135 feet and an average of the bucket samplings, taken for a period of three days showed the it to run \$56 gold to the ton. The winze is being sunk from the 150 level. As soon as it put down even with the 200 level of the main shaft, surveys will be made and a drift started to tap

the bottom of the winze.

The ore chute in the winze dips to the north. All the other veins on the property dip to the southwest, showing istinctively that it is entirely separate from the other explored ore channels.

Manager J. D. Clive has had an analysis of the ore taken recently, which has demonstrated to his satisfaction that it can be easily treated by the combination process of cyanide and amalgamation, making a saving of bout 93 per cent. Upon plates alone

was saved \$32 to the ton.

The Pack mine, near the Charm, pro dees ores peculiar in character and which are particularly susceptible to the cyanide treatment. This property is under development and is locoking etter every day

A CHAMPION OF TONOPAH. Mr. C. L. Hanson Comes to Salt Lake To Buy Machinery.

An arrival in Salt Lake last evening was Mr. C. L. Hanson, a prominent mining man, who is interested quite extensively in Tonopah, Nev. He came over to order soms Pachinery for the California-Tonopab mine, which has only recently developed into one of the big bonanzas of the marvelously rich

Mr. Hanson is very enthusiastic over the future of Tonopah, and believes Salt Lake capitalists and business men, with few exceptions, have not een brought to realize the importance of the Tonopah and surrounding districts. Many have lost a golden oppor-tunity to get into the camp and make money while the business interests of this city, the visitor declares, have not been on the alert to correl the bulk of the trade, which could be diverted this

On the way over Mr. Hanson was accompanied by George E. Guen of the American Smelting & Refining company, who was sent into the district in the interests of that great corporation. Some distance out of Hawthorne, Nev., the train which they were aboard on the Carson & Colorado railroad, en-countered a terrific sand storm. The wind blew at a furious rate and its force was so great that several cars

were detailed.

The passengers are compelled to spend about 12 hours upon the desert at the point of the wreck without food.

CREAT SHIPMENTS OF CILSONITI

Near Price Last Year.

Located in Grand County-Properties To be Developed in the Spring -Other Notes of Interest.

Special Correspondence, Price Utah Jan 28 .- Capt, Edgerly, manager of the old Pariette mines out towards the reservation about 90 miles. is in town with a carload shipment of first grade of gilsonite, which is going to the company's factory at Chicago. These properties have been in litigation for a number of years, but hereafter will be steady shippers of about two cars a week, it is expected. After the mineral on the reservation is thrown open, says the captain, his company will become a real rival of the St. Louis concern, which now has practically a monopoly on this class of ores. The stuff is worth on board the cars at Price about \$65 a ton, and when the Moffat road comes through will be more valuable because of better modes of transportation.

Everything here is quiet in oil circles, but with the opening of spring and the disappearance of snow in the hills and on the desert conditions will be changed. At least five companies and individuals will resume operation in Carbon county, as well as two below Castle Dale, in the Sinbad country, and one or two at Green river. ing this month something like \$300 has been taken in for recording oil location notices in Carbon county, and this record will not beat Emery county, and perhaps not Grand.

During the year just closed the St. Louis Gilson Asphaltum company, whose freights are all handled at Price, paid out here over \$67,000 to wagon freighters alone. From this some idea of the tonnage may be had when it is stated that the rate for hauling averages about 80 cents a hundred pounds. Arthur J. Lee and Denver associates are developing an uranium property down in Grand county, which promises well, judging from a number of tests already made. A force of men will soon be sent out to start work for the summer and spring campaign.
The New York & Utah oil well in Clark's valley is shut down at present, awaiting the arrival of a quantity of

NEW YORK SHUT DOWN. Cessation Will Last Pending Arrival Of Machinery.

At a meeting of the directors of the New York Bonanza held vesterday afternoon it was decided to suspend operations for the present. This action was taken, Manager R. G. Wilson stated this morning, pending the arrival of the machinery for the

shaft is down to the 200 level and and Mr. Wilson believes it is simply waisting money to continue work any longer with the horse whim. The machinery is expected almost any day, it having been shipped from the east some time ago.

Mike Omeara in Town.

M. J. O'Meara came in from Tone pah last night to look after some busi ness matters relative to the market bonanza property recently acquired by himself and associates. Mr. O'Meara declared that he had nothing new to add any more than

that good progress is being made with the development of the new acquisition. Mr. O'Meara will make his visit short one and will return to Tonopah within the next day or two.

Blue Jay Assay.

F. H. Lathap received assay returns this morning from a sample of or brought in a few days ago from the Blue Jay mine in the copper belt of Beaver county. The returns show it to contain values of 9.6 per cent copper.

Mr. Turner Installed. The new superintendent of the Yankee Consolidated of Tintic, J. P. Turner, has assumed the duties of that po-He departed for the mine yesterday morning and immediately got nto the harness. He was accompanied by his son.

Transfer of Mining Claims.

Louis G. Benzeger has brought suit in the district court against the Butter-field Mining company. He alleges that 38.558.33 is due him for services of George W. Keel, as superintendent juring the period of time between Nov. 1, 1898 and Jan. 7, 1901.

TRANSACTIONS

WERE SMALL

New York, Jan. 29 .- The market opened dull and without material change ither way. Transactions were small and confined to the leading issues. Trading increased slightly in volume and prices hardened generally to last night's level or above under the lead of everal speculative favorites. St. Paul, Missouri Facific and Amalgamated Copper were most in demand and advanced a point. The buying of St. Paul was in large blocks and was due to some extent to expectations that at the regular monthly meeting today some action may be taken on the expected stock distribution. Delaware and Hudson advanced a point and General Elec-

Price movement- was unimportant in the leading stocks during the second hour and the culmination of the earlier ouying movement was followed by ome slight recessions in the leaders. Professional operators were not dis-posed to do much and the market soor elapsed into its recent sluggishness. few stocks made material gains, mud-ing Pullman, Minneapolis, St. Paul and Sault Ste Marie preferred and Rock sland preferred.

Bonds were quiet and about steady or the active issues. A spasmodic buying movement in People's Gas carried it up a point, but without effect on the general list, which continued dull and uninteresting. Some of the high prices specialties moved widely.

rrices aropped slowly on limited ofcuri Pacific and Amalgamated was lecidedly heavy and there was also ome pressure against Pennsylvania, hich had an effect on the general list. Thor stocks continued to show the est pronounced changes, Chicago Terninal, Hocking Valley and Lackawanna declined 1 to 2, while Erie second pre-ferred and Chicago & Eastern Illinois preferred improved about as much.
